

Open Chords

There are two main types of chords in music; Major and Minor. This page shows the main shapes that you need to learn to play the guitar. If you don't play the strings with crosses on them, then the lowest sounding note in the chord will be the TONIC or bass note.

☒ This means don't play this string

⊗ This means don't play this string, but it will still sound okay if you do

Major Chords

This is the best way to play G but, if you find this too difficult....

you can play G this way. It is good to be able to play G both ways

Minor Chords
